DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a method of cancer treatment using ErbB antagonist classified in class 424, subclass 130.1.
- II. Claims 15-20, drawn to pharmaceutical composition comprising ErbB antagonist, classified in class 424, subclass 130.1
- III. Claims 21-23, drawn to method of screening candidate patients for ErbB antagonist treatment.

The inventions are distinct, each from the other because of the following reasons:

Inventions groups I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions groups are different methods requiring different reagents and methods steps for achieving different objectives.

Inventions II (product), I and III (process) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product (the active ingredient, i.e. anti-Her-2 antibody) as claimed can be used in a materially different processes of group I or III

These inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification. The search required for each of the above inventions is not coextensive with regard to the literature and the sequence searches. Further, a reference which would anticipate the invention of any one group would not necessarily anticipate or make obvious the any of the other groups. For these reasons, restriction for examination purposes is proper.

The inventions are distinct, each from the other because of the following reasons:

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
